

Mobile Heating Unit

HW

DESCRIPTION

The mobile heating-unit type **HW** (open water system) is designed for the quick preparation of hot water, offered in three variations: 9,0kW, 18,0kW and 24kW.

The **HW** units are equipped with an integrated pump (capacity 2,8 m³ by 3 bar) and integrated water tank (80 l). Additionally: Outlet temperature regulation, dry-run protection, pressure monitoring, wheels.

The **HW** units can be easily connected to a tank. Thanks to their stainless steel construction they are specially suited to operation in a humid environment such as the wine-cellar.

These hot-water devices are the ideal solution for wineries, breweries and cideries without flowing hot water, or where the targeted heating of single tanks is required.

CHARACTERISTICS

- Mobile units - on rolls
- Housing completely made of stainless steel
- Instant heating
- High efficiency and energy-saving
- Equipped with electronic control board with LCD-Display for easy operation
- Precise adherence to the set temperature (+/- 1°C)
- Suitable for water only and for water-glycol mixtures.

Specifications subject to change.

APPLICATIONS

- Hotwater supply
- Warming of tanks and containers
- Fermentation control (in connection with heat exchangers) and for malolactic fermentation.

Model	HW 09	HW 18	HW 24
Heating capacity	9 kW	18 kW	24 kW
Delivery rate	20 - 80 l/min		
Pumping head	42,5 - 12,8 m		
Power input	9,8 kW	18,8 kW	25,2 kW
Power supply	400V / 3Ph / 50Hz		
Ambient temperature	5 - 35°C		
Water temperature	5 - 90°C		
Minimum flow rate	20 l/min		
Connections	1" / Geka		
Dimensions (LxWxH)	930x440x920mm	930x440x920mm	950x470x930mm
Weight	49 kg	51 kg	62 kg
